

Deep Groove Ball Bearing

1600 Series-16011

Bearing Designation

Open	16011
RS	16011 RS
ZZ	16011 ZZ
Dimension [mm]	
d	55
D	90
B	11
rs min	0.6
Basic load ratings (kN)	
Cr	18.6
Cor	15.3
Speed ratings (rpm)	
Grease	7700
Oil	9000
Weight (Kg)	
	0.258

Internal clearance

A standard internal clearance (CN) is suitable for the operation of the bearing in case of ordinary temperatures and for customary fits. An increased internal clearance (C3) is recommendable in case of high temperature gradients between the rings or in case of fixing the bearing through a press fit.

Seals

Plastic seals (RS/2RS) have the optimum sealing action with increased friction. Metal seals (Z/ZZ) are suitable for higher speeds, but they have a limited sealing action as they seal contactless. Open, seal-less bearings are suitable for extremely high speeds and - furthermore - they can be regreased easily. However, they are more susceptible to soiling.
